

Business School
UNIVERSITY OF COLORADO DENVER

Information Systems Program

Module 8

Developing Business Data Models

Lesson 1: Data modeling goals and challenges

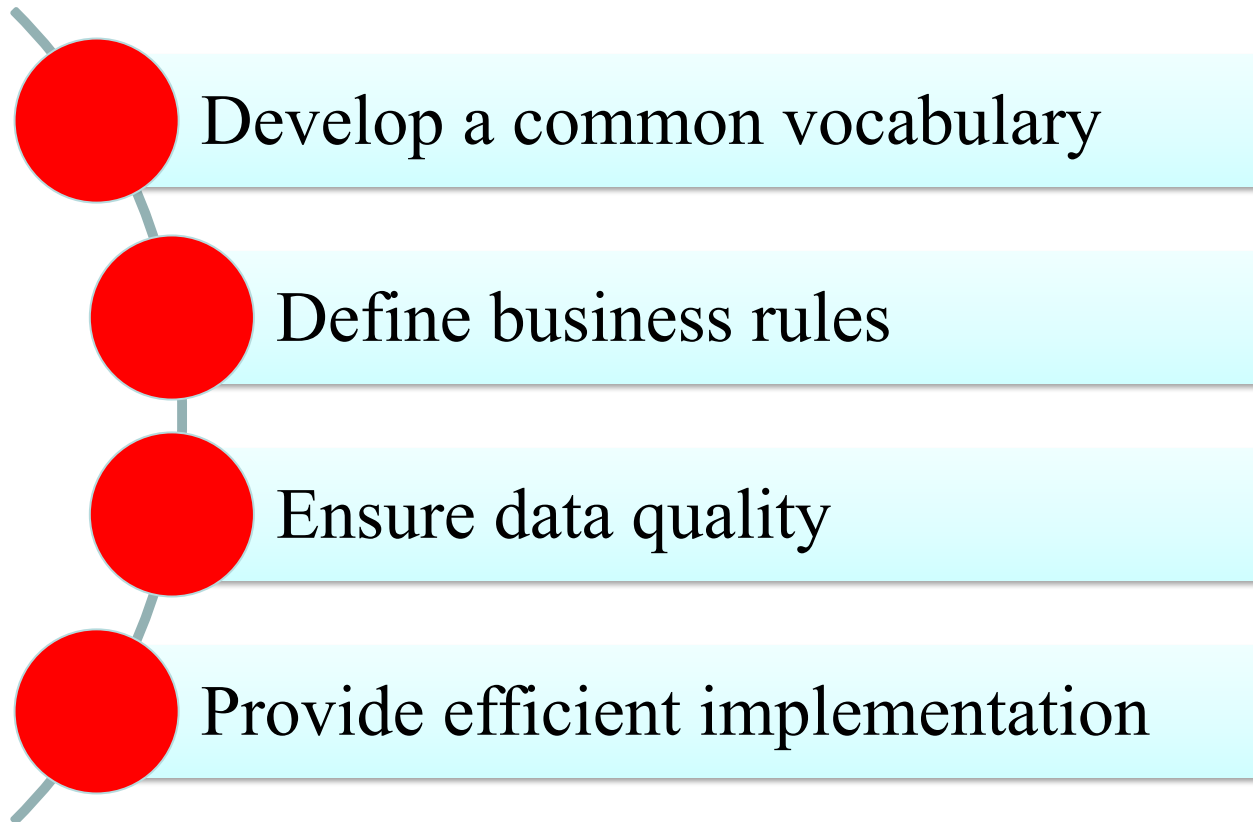

Lesson Objectives

- Gain context for skill development
- Explain goals of conceptual data modeling
- Explain the position of this module in the database development process

Broad Goals of Database Development

Develop a Common Vocabulary

- Diverse groups of users
- Difficult to obtain acceptance of a common vocabulary
- Compromise to find least objectionable solution
- Unify organization by establishing a common vocabulary

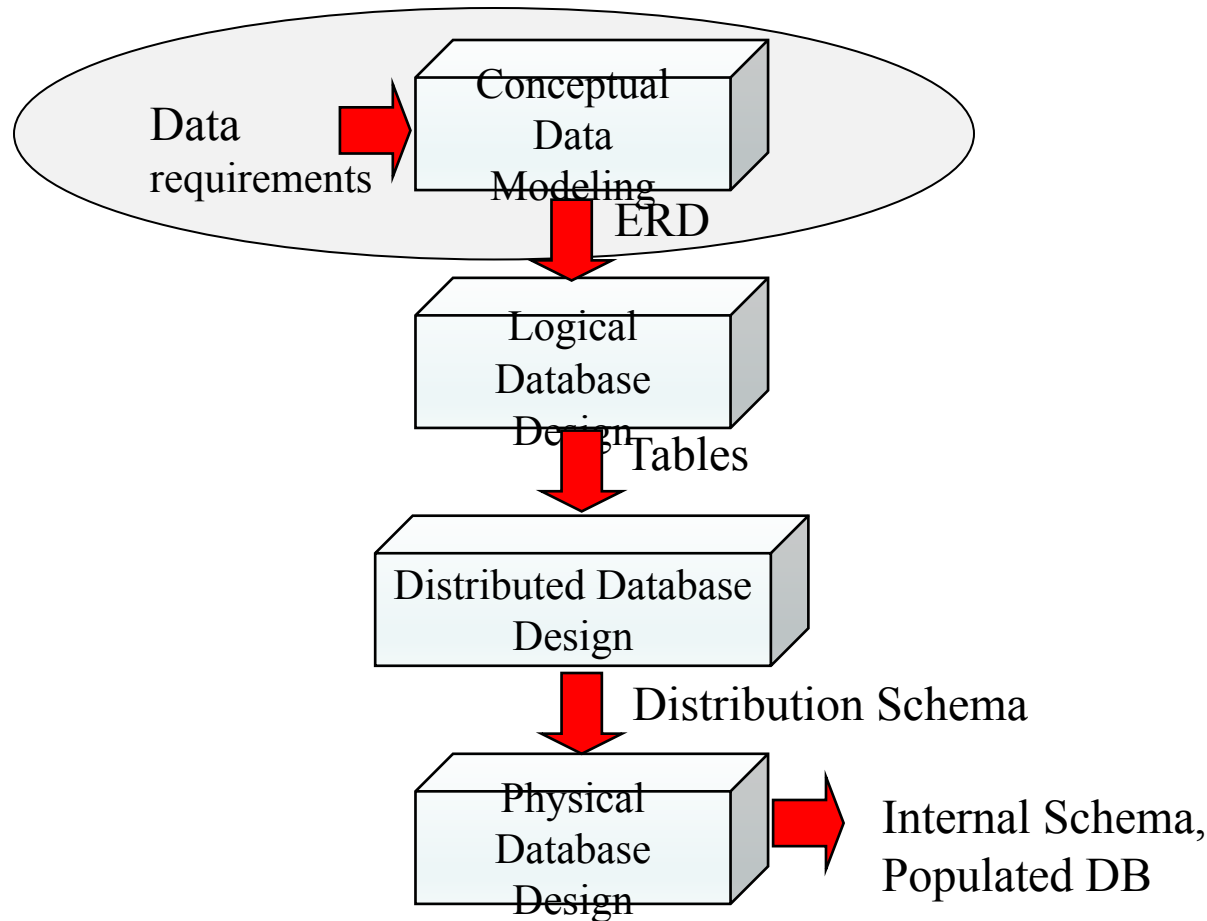

Define Business Rules

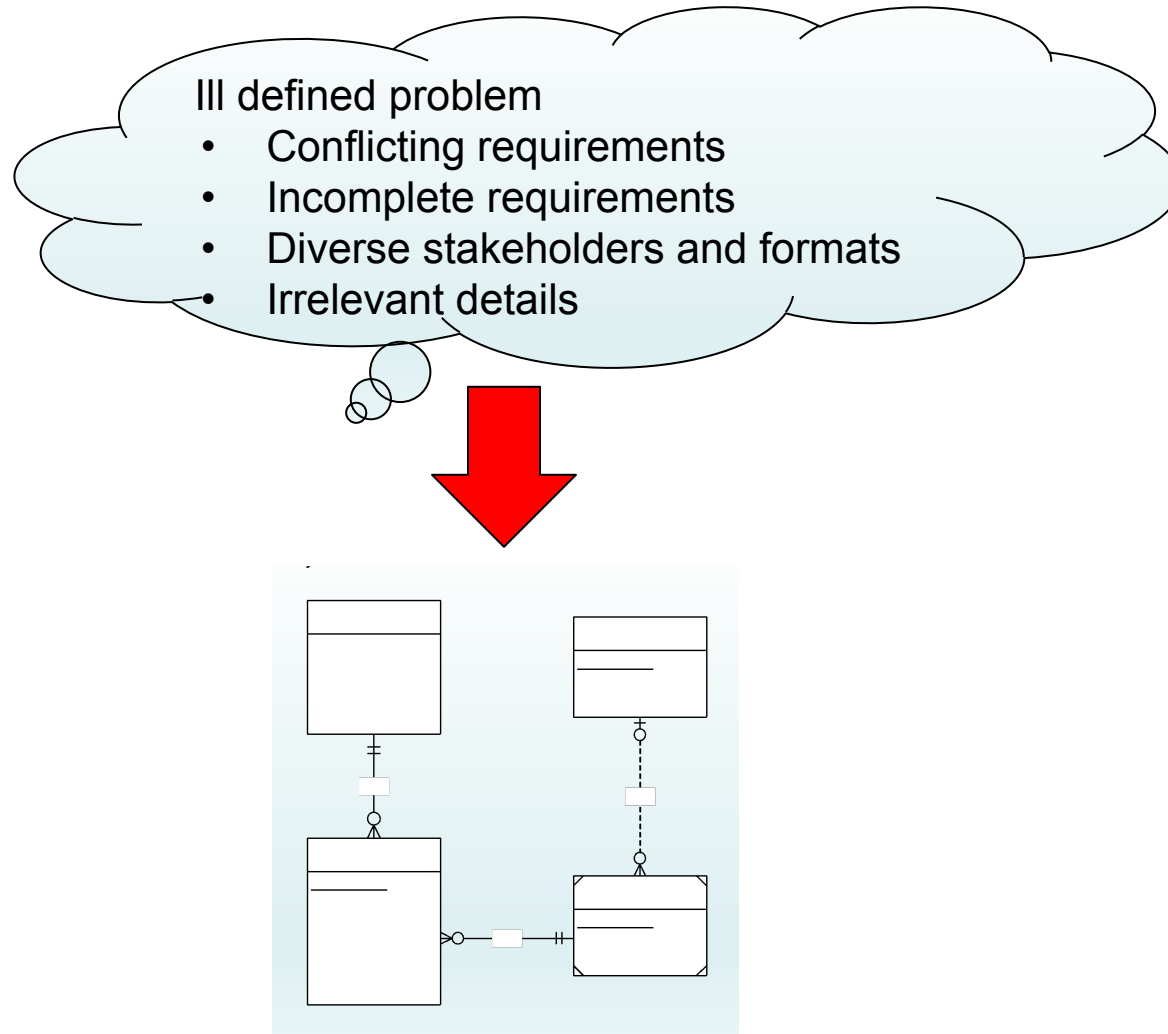

- Support organizational policies
- Determine restrictiveness
 - Too restrictive: reject valid business interactions
 - Too loose: allow erroneous business interactions
- Provide exceptions for flexibility

Database Development Phases

Conceptual Data Modeling

Summary

- Essential part of information systems development
- Focus on development goals
- Complex team development process
- Subset of conceptual data modeling process
